

MICROSOFT WORD 2010

Katherine Mitchell

Info & Education Instructor

Muncie Public Library

is the word processing program of the Microsoft Office suite that allows you to create *documents* and *reports*.

Microsoft Word 2010 Main Screen

Microsoft Office Interface

Ribbon / Quick Access Toolbar, File Tab (which brings up the Backstage View)

Quick Access Toolbar

Tools shown here are always visible. You can add your favorite tools to this toolbar, allowing for a set of commands independent of the tab on the Ribbon currently displayed.

Ribbon Tabs

Click any tab on the ribbon to display a set of tools grouped together related to that task.

Hide the Ribbon

Click this icon to minimize the ribbon and provide more work space.

Dialog Box Launchers

Dialog box launcher icons next to any ribbon group label can be clicked to open a dialog box with more options for that group.

Ribbon Groups

Each ribbon tab contains groups, and each group contains a set of related tools. Here, the **Paragraph** group on the **Home** tab contains tools for how text should be aligned within the document.

Customizing the Quick Access Toolbar

1. Click the down arrow to the right of the commands. A popup menu will appear with available commands.
2. Click on the **command** to add it to the **Quick Access Toolbar**.
3. If you don't see the **command** you want in the popup menu, select **More Commands** from the menu. This will open a new window that will allow you to select from all available Office commands.

In this example, **Page Layout** is the active tab of the Ribbon

You can still get the same advanced options from either group by clicking on its dialog box launcher

Here is the **Paragraph** group in the **Page Layout** tab.

Note this Paragraph group focuses on Paragraph indent & spacing

The Home tab has its own Paragraph group with different options.

Using the View Tab

The default view in Microsoft Word 2010 is **Print Layout**, displaying the document as it would be printed.

The document view can be changed by selecting one of the other Layout options from the **Document Views** group.

You can also change the **Document View** by clicking the view icons along the bottom of Microsoft Word

The Backstage View appears when clicking the File Tab on the Ribbon. This is a set of commands you use to **do** things to a document.

Creating A New Document

Click **File**

Click **New**

You can select **Blank Document** (this is selected by default) and then click

You can also create a new document from a **pre-existing template** in one of the categories under the **Office.com Templates** section

How to open a document?

Now you get to Open a Document

Open

Exercise 1-Don't Quit
Microsoft Word Document
120 KB

There are 2 ways to open the file:

Open Word 2010 application and click on file. In the pull down menu, click Open. Look for Desktop at the navigation pane and click on it. Find the file Exercise 1-Don't Quit.

Minimize or close all tabs. View your desktop and find the file Exercise 1-Don't Quit. Double-click on it to Open.

Saving a document...

- The default file format when clicking  Save is the Word Document (.docx) file format.
- This file format ensures that all document formatting is saved and will be available the next time the file is open.
- Clicking  Save saves your document to

If the file needs to be shared with a computer with Word 2003 or earlier (.doc), or you need a different file type than .doc, Use  Save As

Change
 Save as type
 to the type you need.

Here is a way to save directly to a **PDF** (portable document format) file:

To save a Word document as a PDF, click the **File** tab, and then click **Save & Send**. Click on **Create PDF/XPS Document** and then click **Create PDF/XPS** (XPS is from Microsoft / PDF is from Adobe)

XPS stands for [XML Paper Specification](http://www.journalofaccountancy.com/Issues/2011/Apr/XPS.htm) – fixed layout document format designed to preserve document fidelity, providing device-independent document appearance. Users can put their digital signature on XPS documents.

Find

The screenshot shows the Microsoft Word interface with the title bar "Exercise 1-Don't Quit - Microsoft Word". The ribbon includes tabs for File, Home, Insert, Page Layout, References, Mailings, Review, and View. The Home tab is active, showing groups for Clipboard, Font, Paragraph, and Styles. In the Editing group of the Home tab, the "Find" button is highlighted with a green arrow. Below the ribbon, the "Navigation" task pane is open on the left. It features a "Search Document" field with a magnifying glass icon. Below this field, there is instructional text: "You can search for text in your document by typing in the search box above." and "Click the Magnifying Glass button to find commands to search for objects, such as Graphics, Tables, Equations, or Comments." A blue arrow points from the "Find" button in the ribbon to the "Search Document" field in the Navigation pane. The background of the slide is light green.

Select **Find** under the Editing group to search for a word or phrase in your document.

A window on the left appears called **Navigation** where you enter the word or phrase in the "Search Document" field & your results display in the lower section.

Replace

is used to replace a word or phrase with another:

Select
Replace
under the
Editing
group

Enter the word or
phrase you want
replaced in the
"Find what" box

Enter the word or
phrase replacing
your term in the
"Replace with" box

You can replace all occurrences of the
word or phrase by clicking the **Replace All**
button or replace the word or phrase one at
a time by clicking the **Replace** button.

Review Tab

This tab is used to review your document, including proofing the document, adding comments, tracking changes, and comparing a document against a previous version.

Proofing

The proofing group assists with proofing your document after it is finished.

Spelling & Grammar

icon is used to check for spelling and grammar problems within the document.

Thesaurus

icon looks up for the meaning of a selected/highlighted word.

Word Count icon will provide you with statistics for your document, including number of words, characters, pages, paragraphs, and lines.

Translate

icon translates your document from one language to another.

Insert Tab

Used to insert various types of objects
