

What is the purpose of a  
remote for a projector

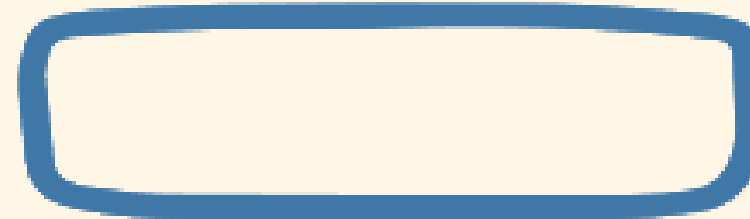

# What is the purpose of a remote for a projector?

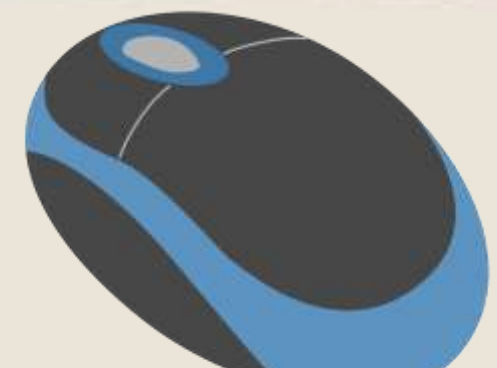

## Key functions:

- Turning the projector on and off
- Changing the input/source (HDMI, VGA, etc)
- Adjusting volume and brightness
- Navigating menus and settings
- Controlling slides or presentations

Human  
Computer Interaction  
IT 7/L

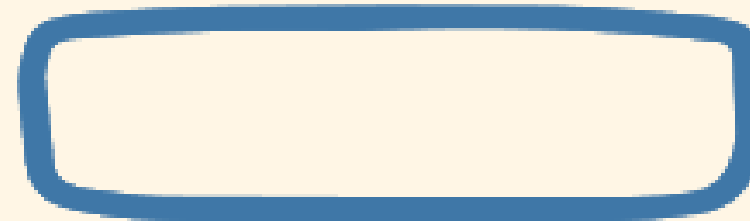

# Interaction *Design*

## OBJECTIVES:

- o What is Interaction Design
- o Good and Poor design
- o The User Experience
- o The Process of Interaction design

**The Tragedy:** Panic ensued as the main door opened inward, making it impossible to open due to the crowd pushing against it. The lack of fire exits meant many were trapped.

**Date:** March 18, 1996

**Place:** Ozone Disco Club, Quezon City, Philippines

**Event:** The fire broke out during a crowded party at the nightclub.

# INTERACTION DESIGN

The design of the interaction between **users and products**.

The goal of interaction design is to **create products that enable the user to achieve their objectives** in the best way possible.

The **interaction between a user and a product** often involves elements like **aesthetics**, motion, sound, space, and many more.

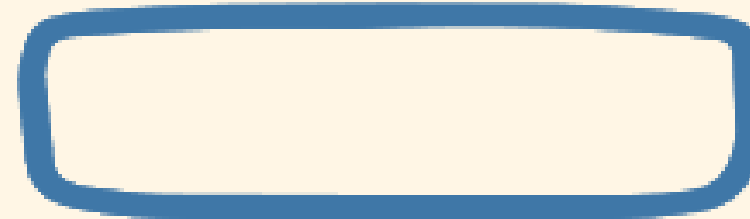

# INTERACTION DESIGN

“The art of facilitating interactions between humans through products and services”

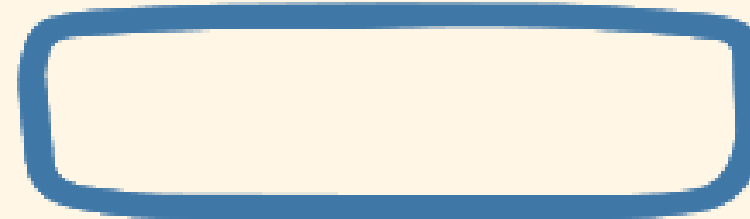

Saffer 2010, p.4

# INTERACTION DESIGN

Interaction design covering all aspects which includes user interface design, software design, user-centered design, product design, web design, experience design, and interactive system design.

# SOFTWARE ENGINEERING

## VS INTERACTION DESIGN

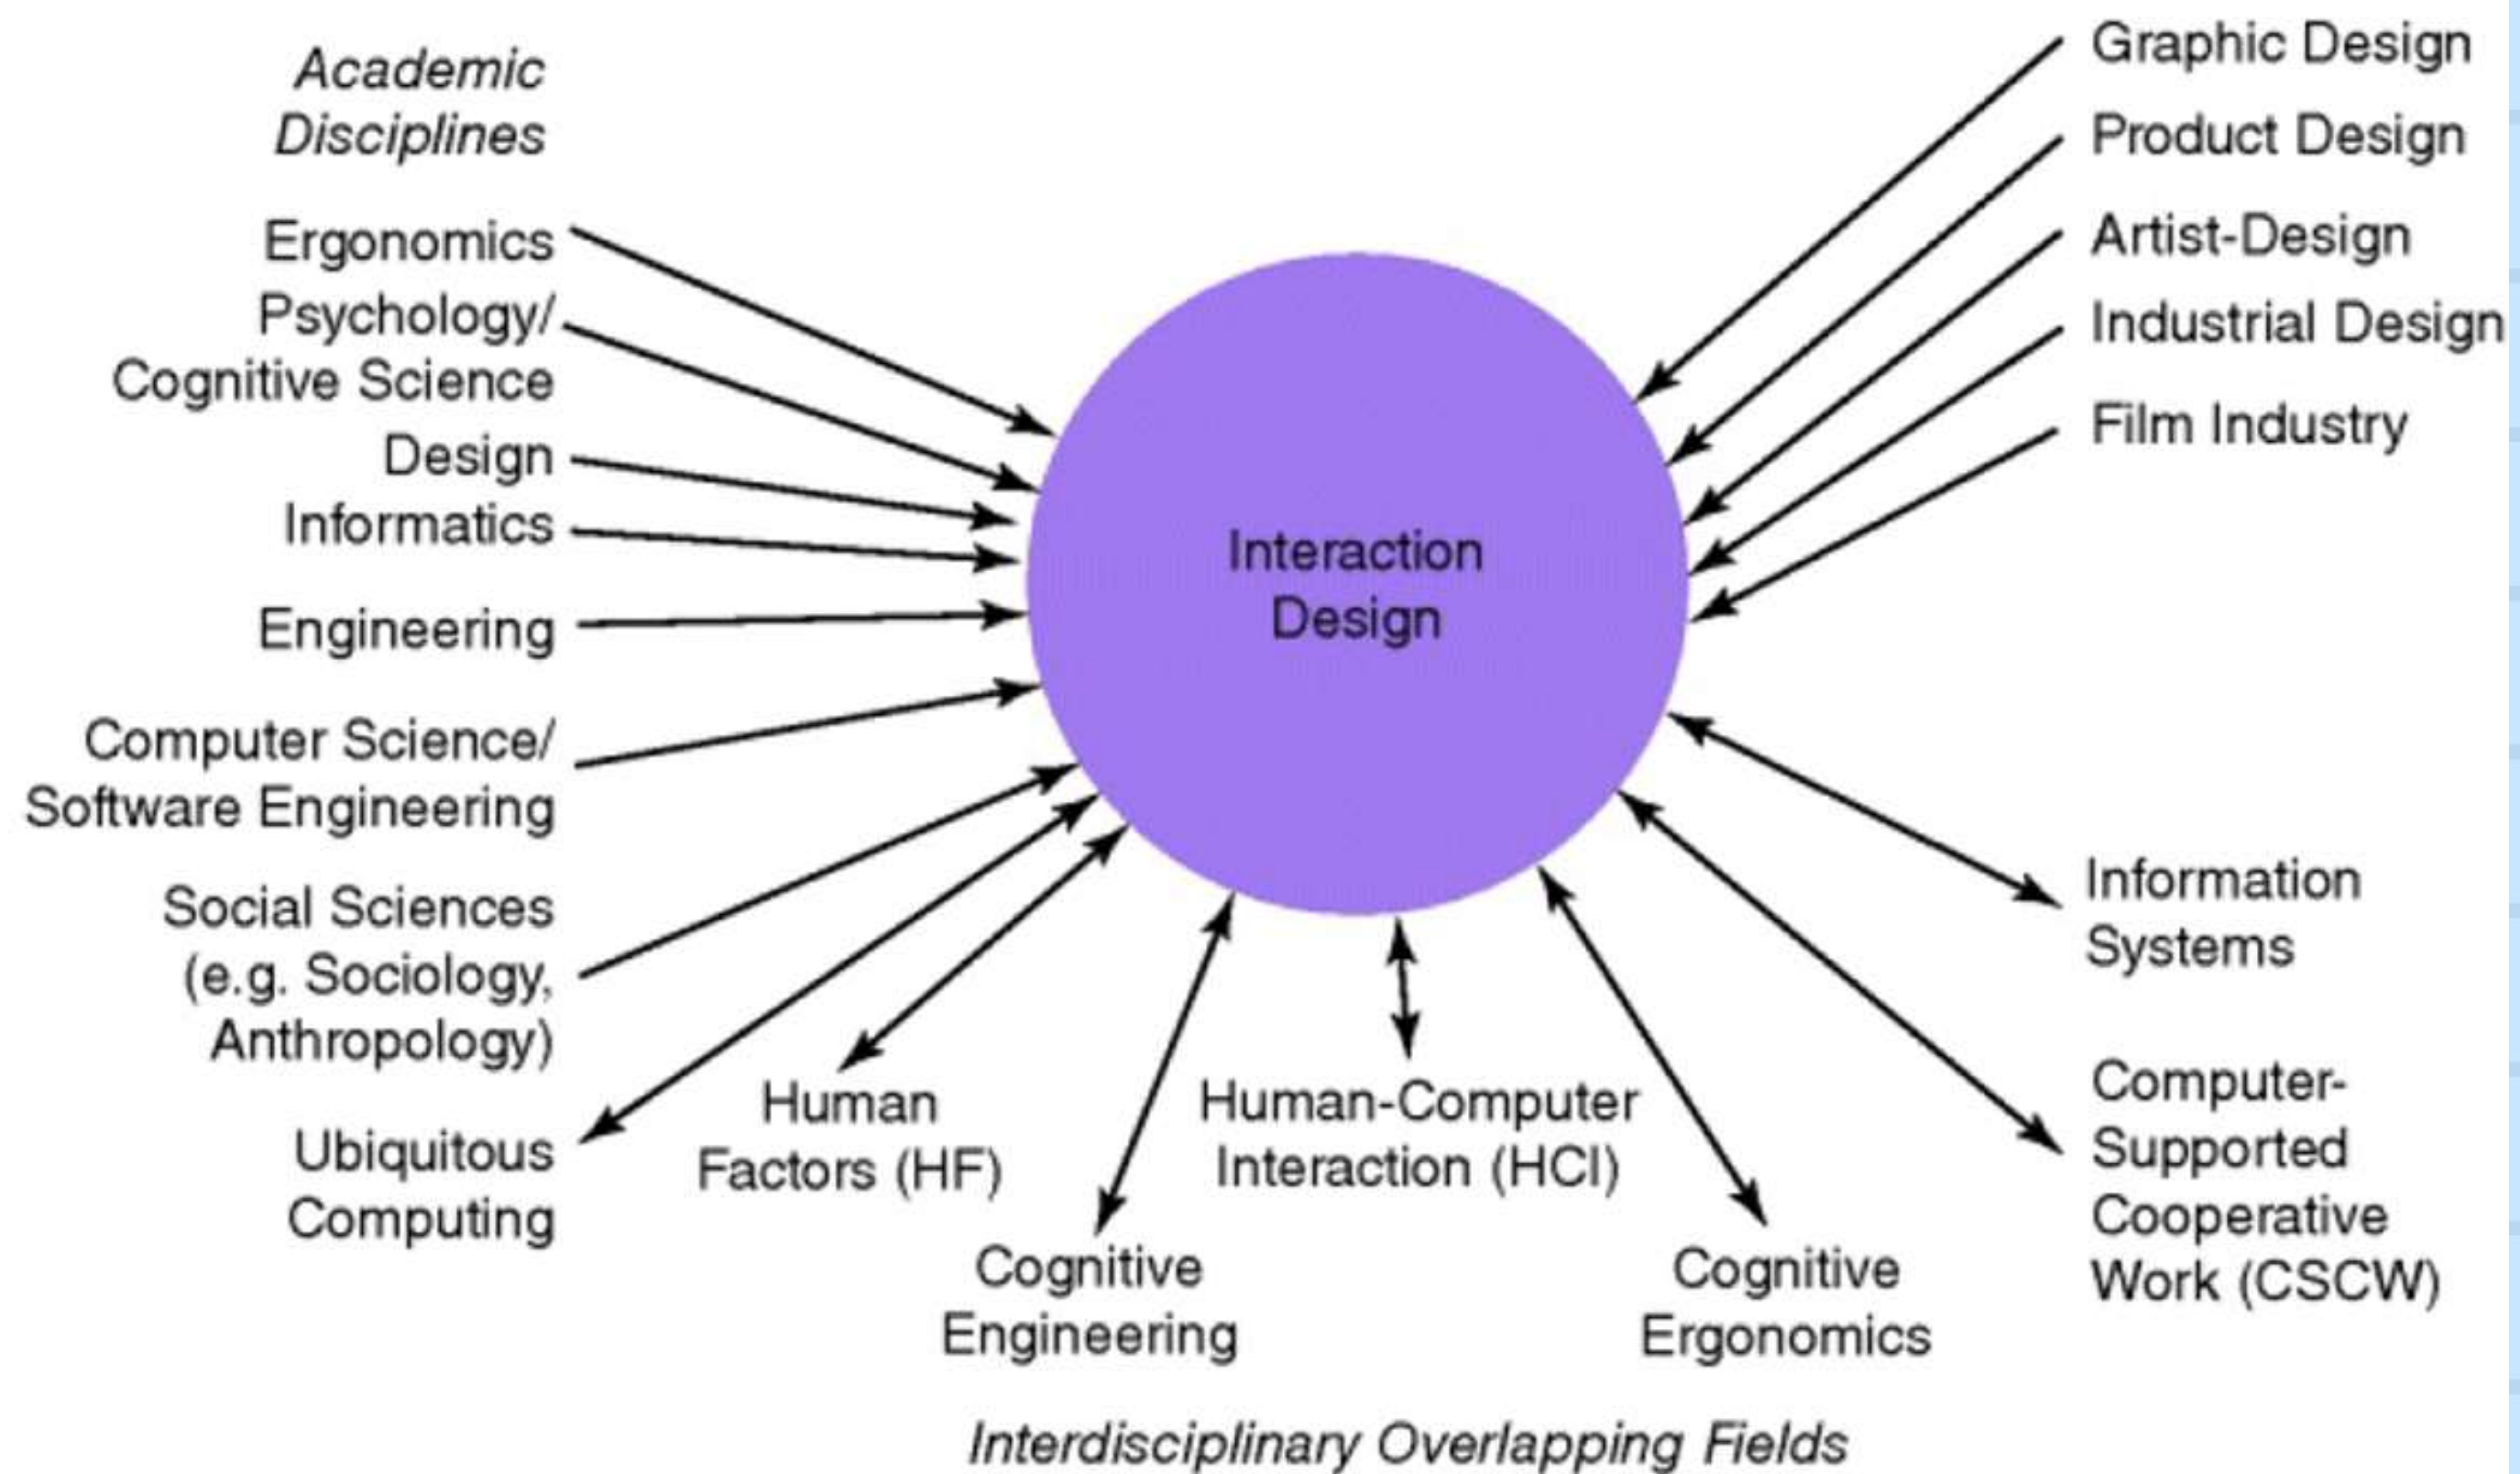

### SOFTWARE ENGINEERING

- Focuses on the technical process of building software, making sure it is reliable, on time, within budget.

### HCI

- Focuses on the user's experience — making sure the product is easy, effective, and enjoyable to use.

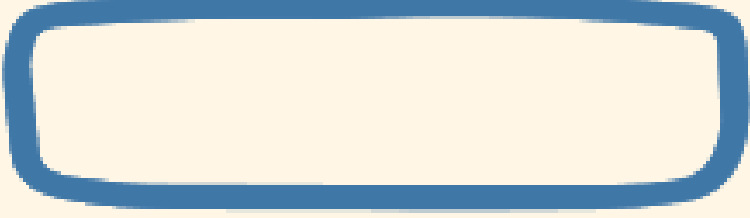

**Figure 1.4 Relationship among contributing academic disciplines, design practices, and interdisciplinary fields concerned with interaction design (double-headed arrows mean overlapping)**

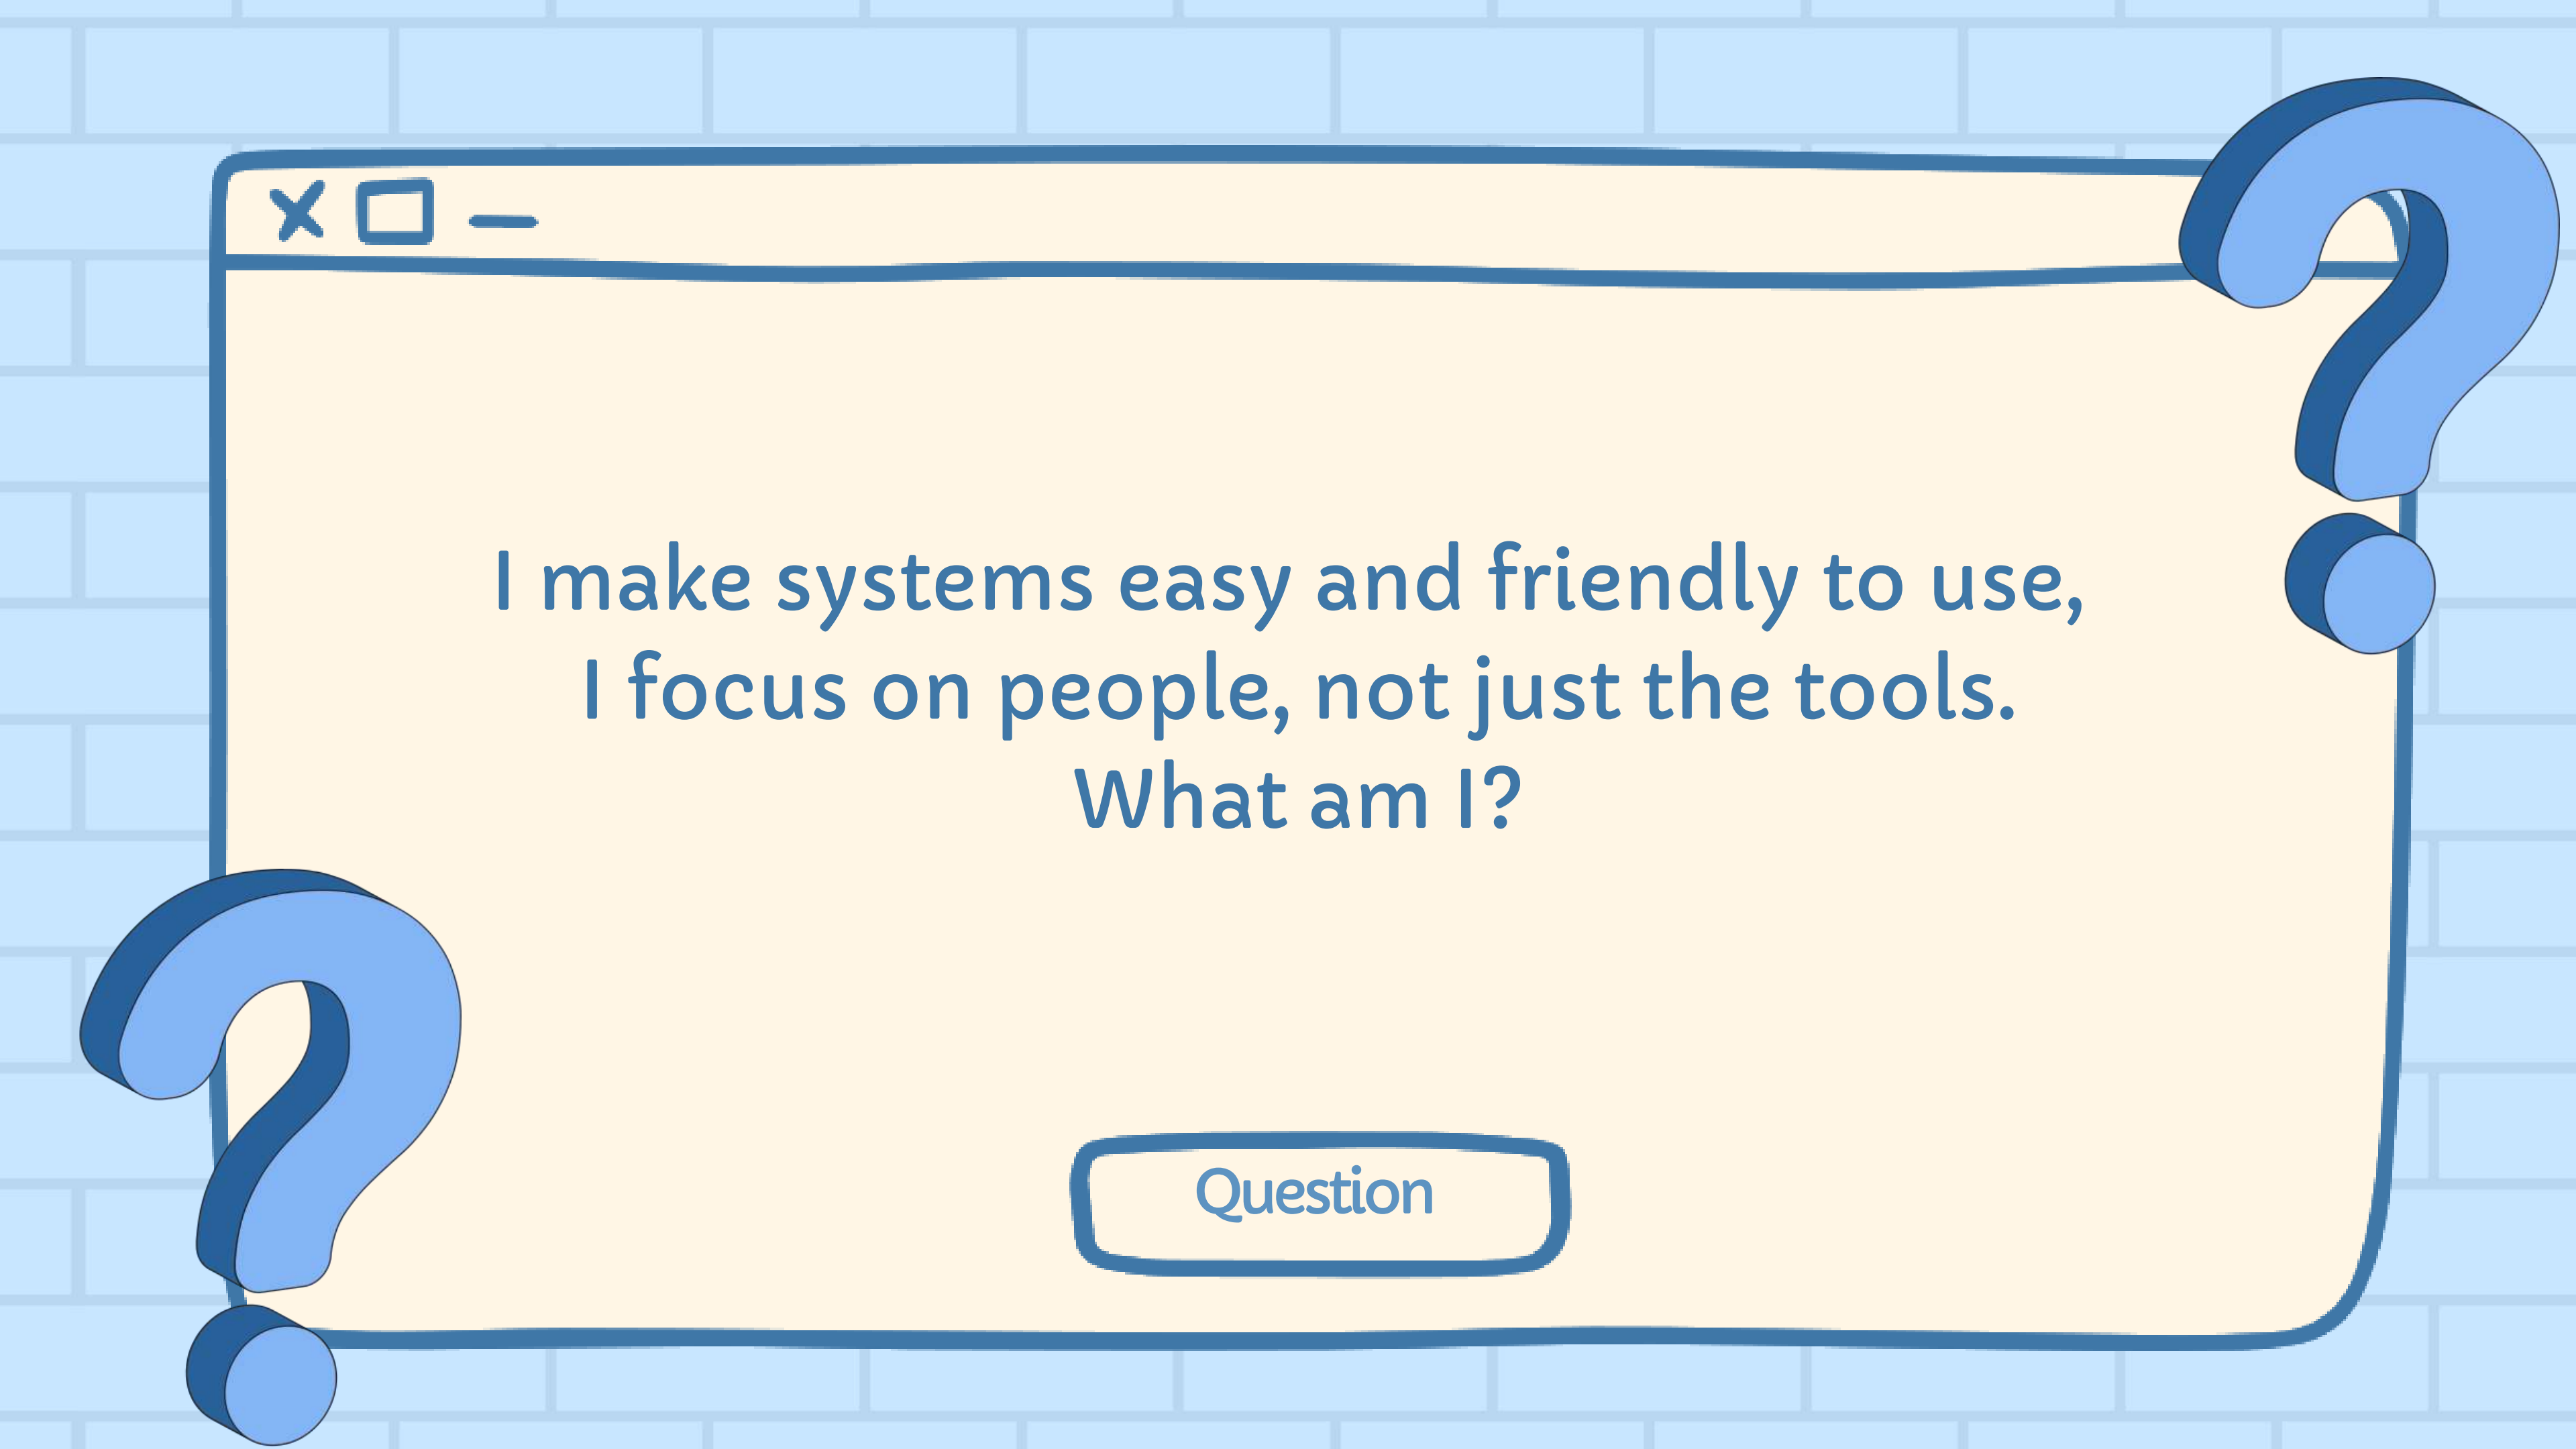

## WHO IS INVOLVED IN INTERACTION DESIGN?

Who to include in a team will depend on a number of factors, including a company's design philosophy, it's size, purpose and product line.

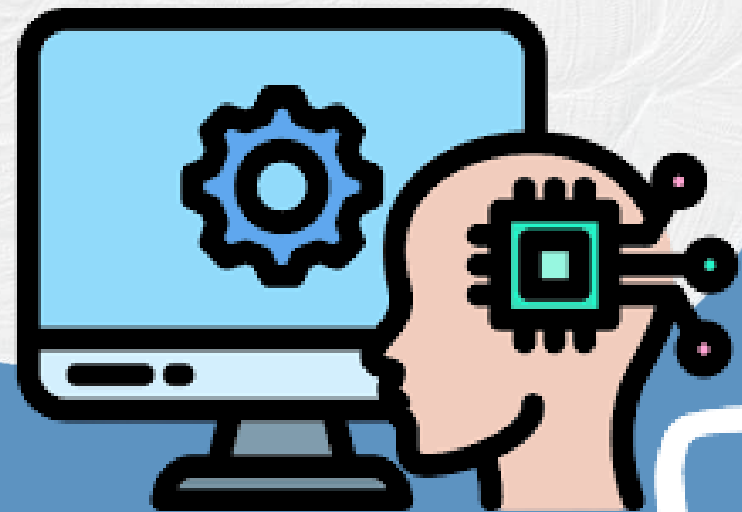

I make systems easy and friendly to use,  
I focus on people, not just the tools.  
What am I?

Question

# HCI (HUMAN- COMPUTER INTERACTION)

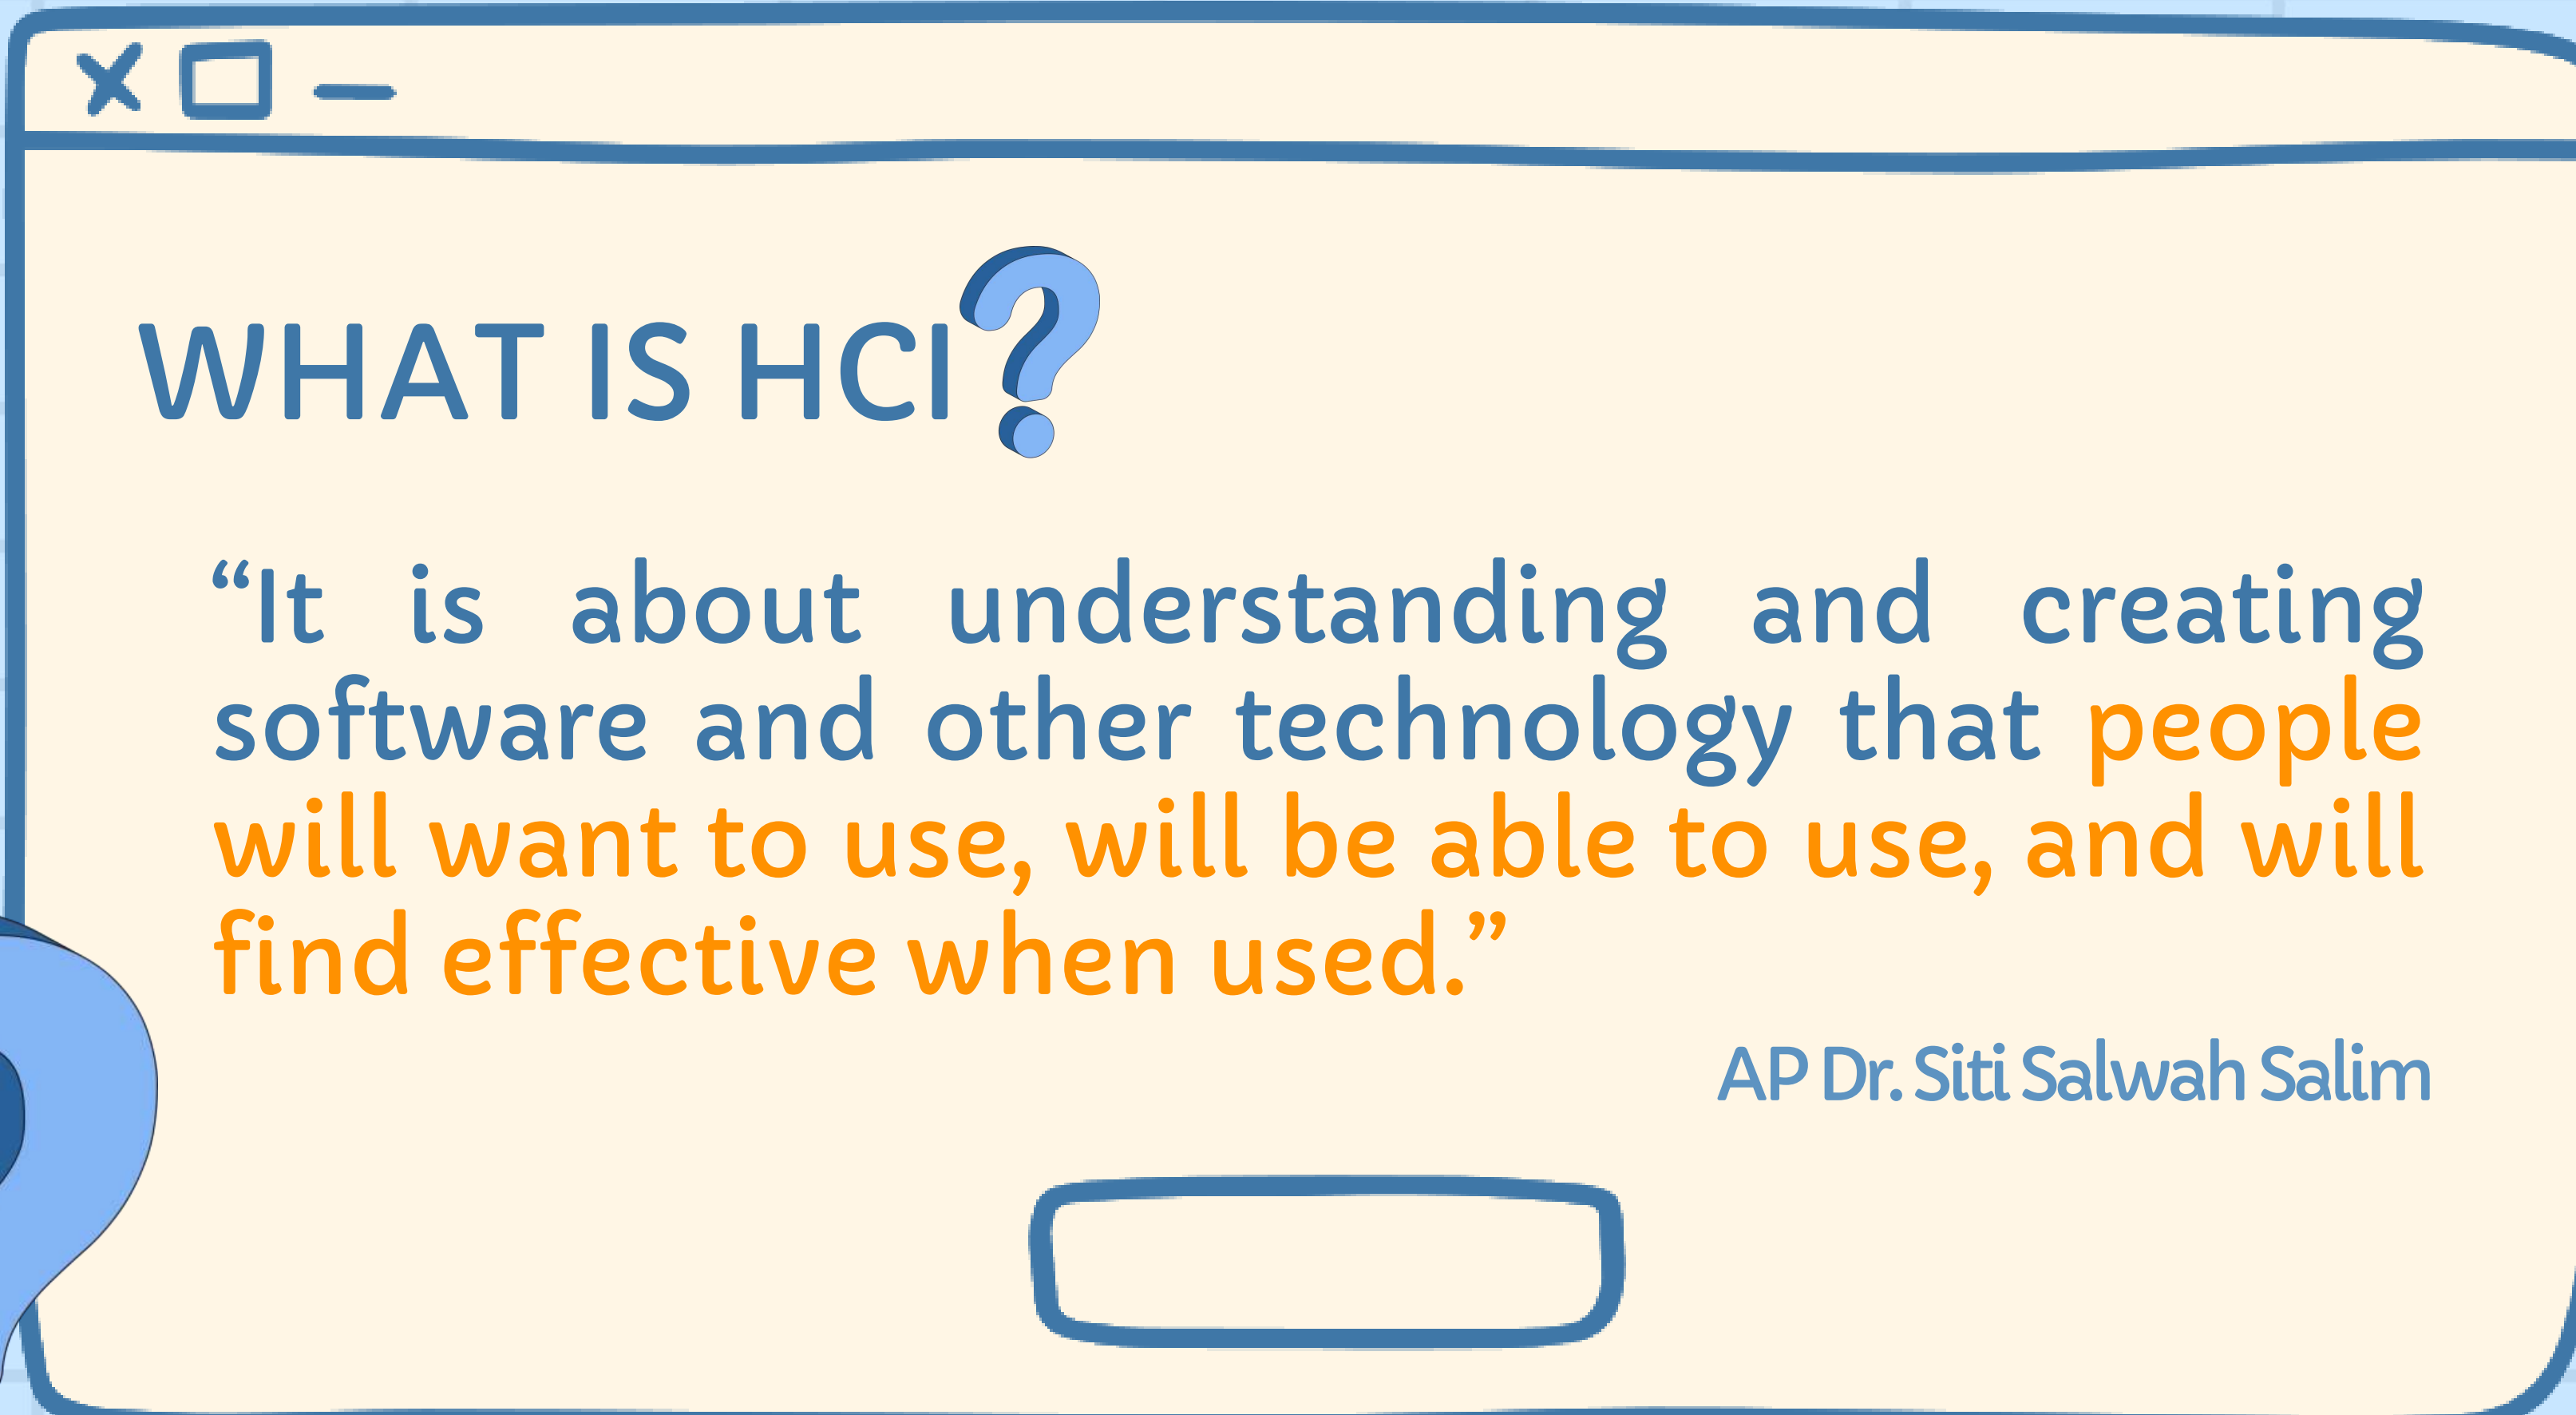

It focuses on  
designing technology  
that is easy and  
enjoyable for users.

Answer

HCI means ?

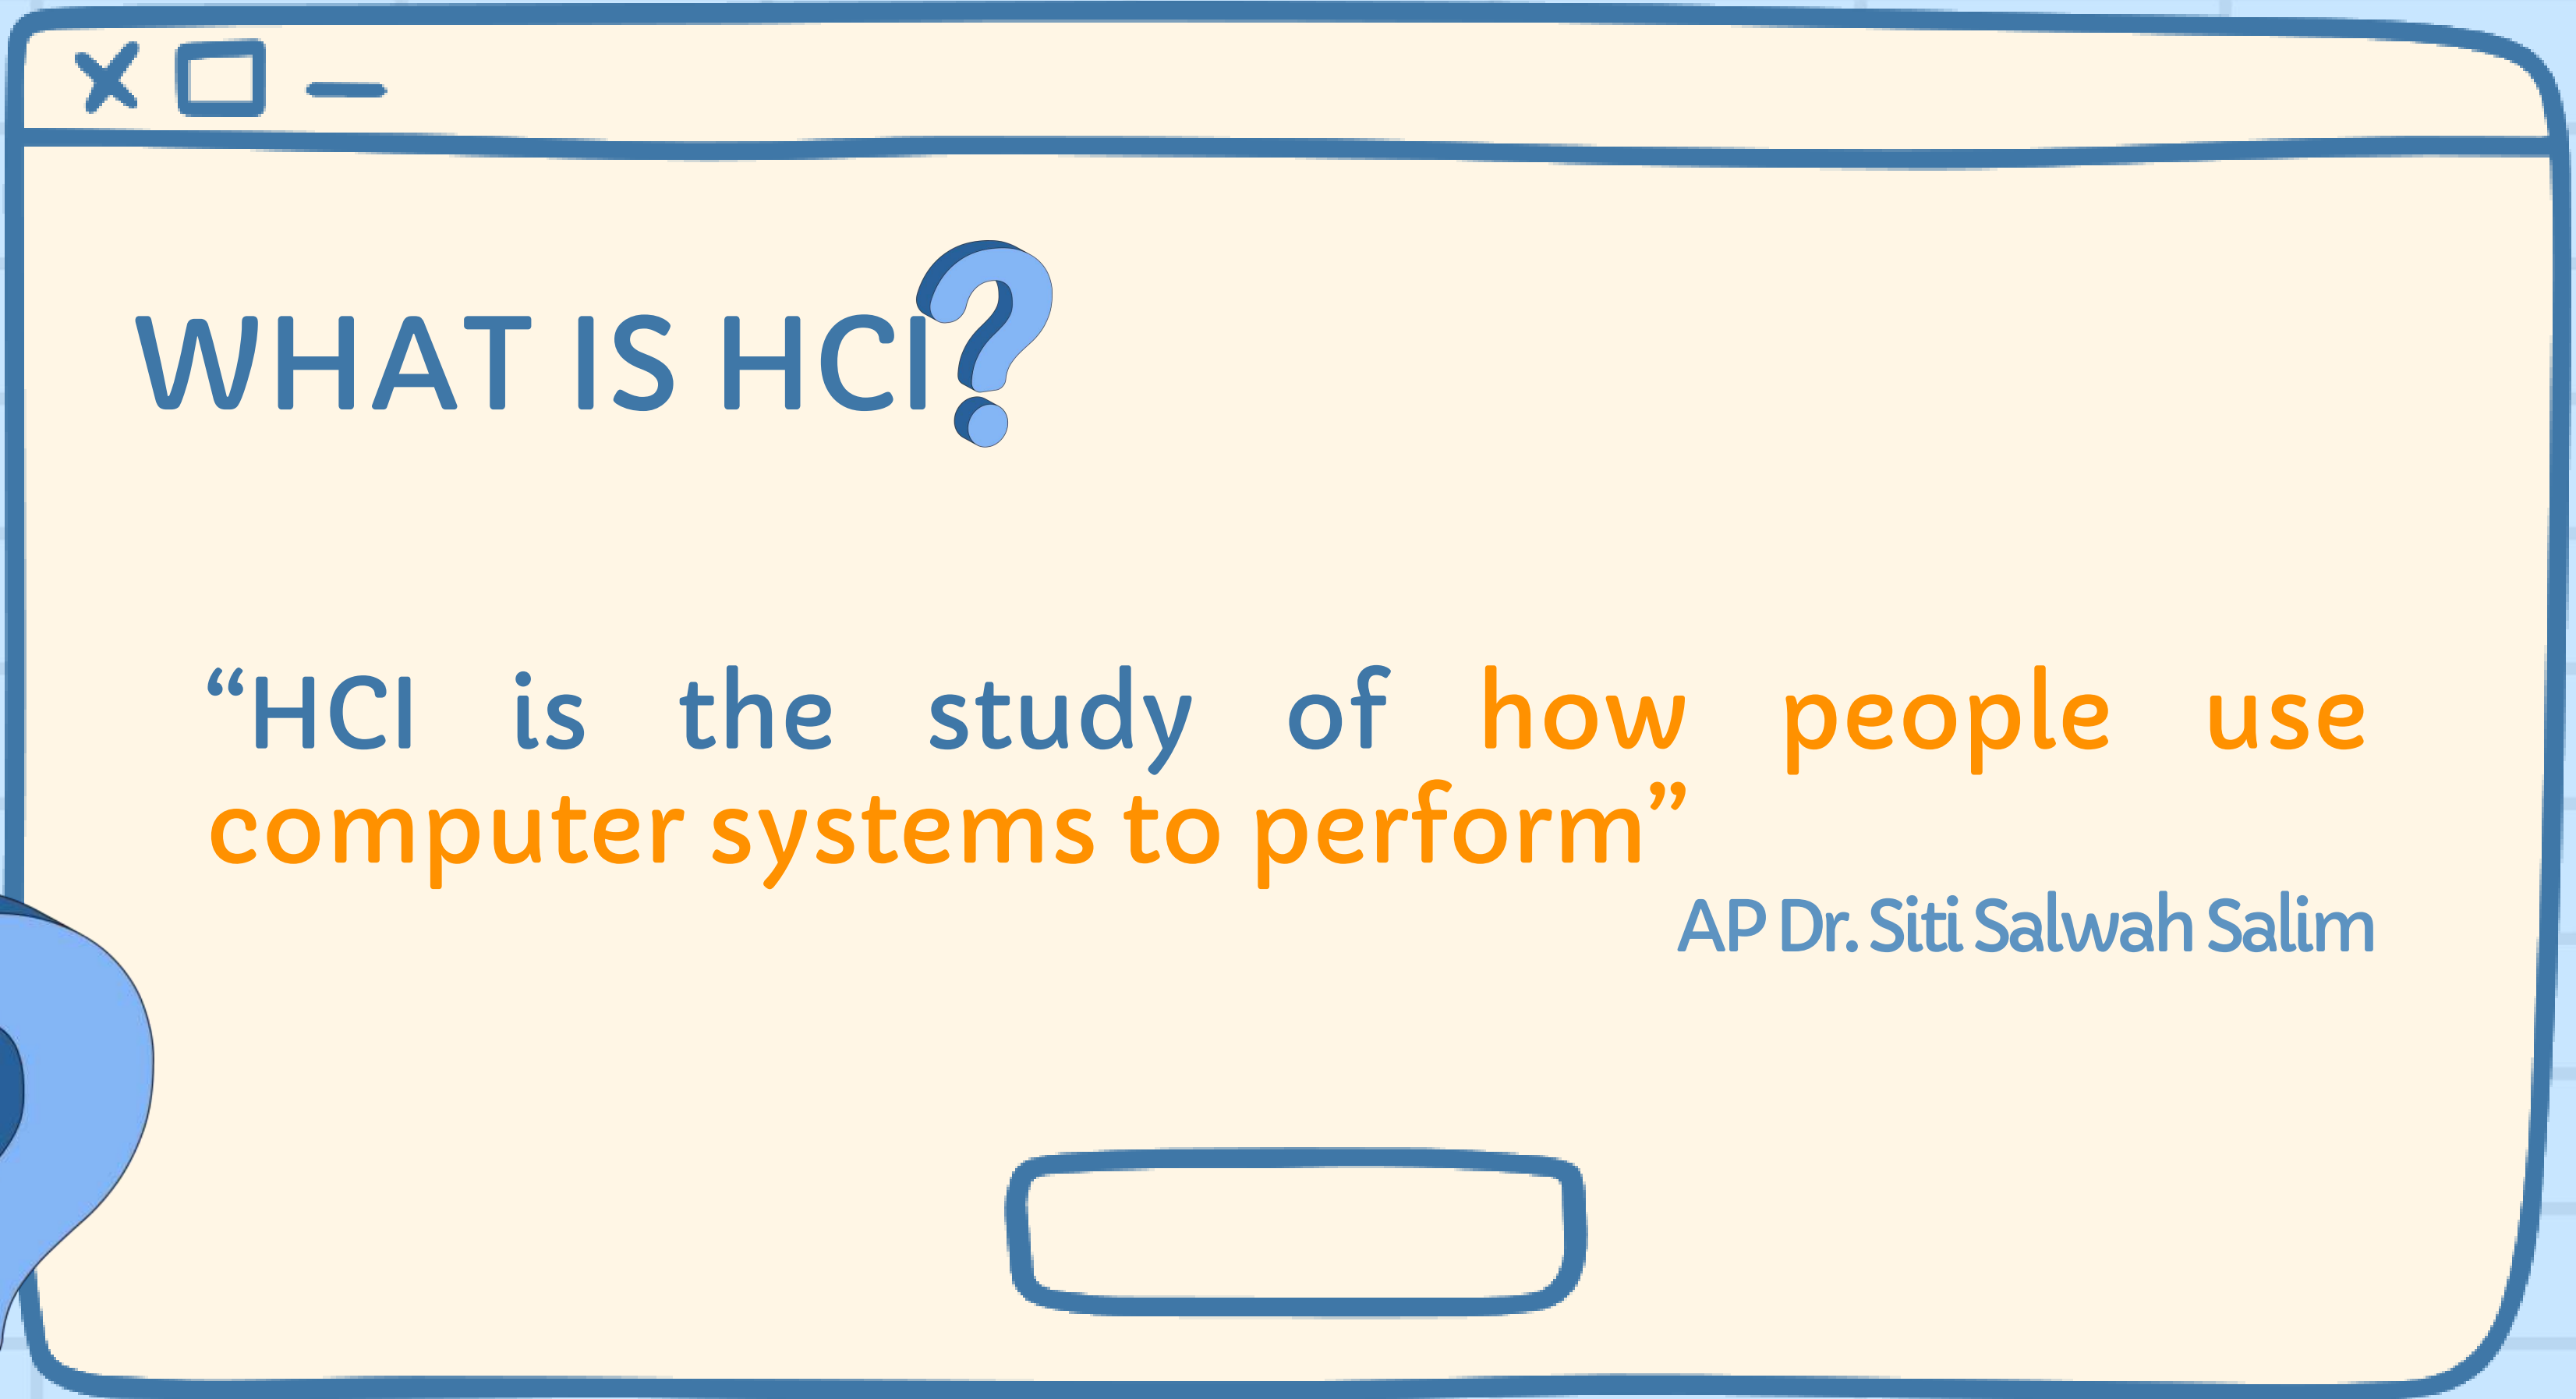

# WHAT IS HCI?

“It is about understanding and creating software and other technology that **people will want to use, will be able to use, and will find effective when used.**”

AP Dr. Siti Salwah Salim

# WHAT IS HCI?

“HCI is the study of how people use computer systems to perform”

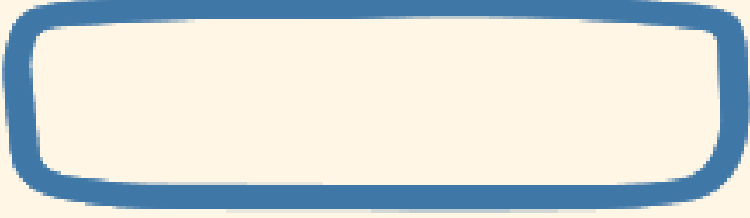

AP Dr. Siti Salwah Salim

# HUMAN COMPUTER INTERACTION

“A usable software system is one that supports the effective and efficient completion of tasks in a given work context”

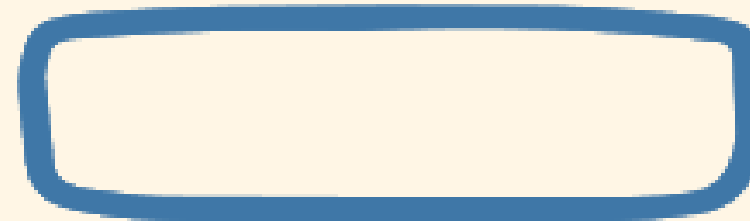

(Karat and Dayton 1995)

# HUMAN COMPUTER INTERACTION

A **product** requires a **users** to interact with it.

## YOU NEED TO KNOW AS A 'DESIGNER':

Users

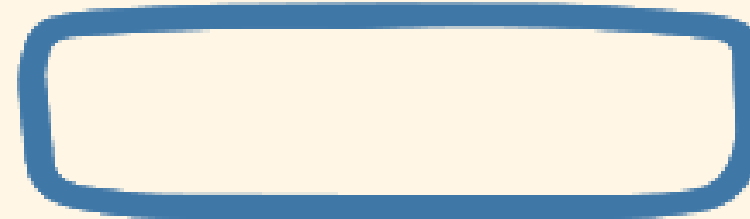

Technologies

Interactions of the people

How emotions work

Desirability & Aesthetics

Human Experience

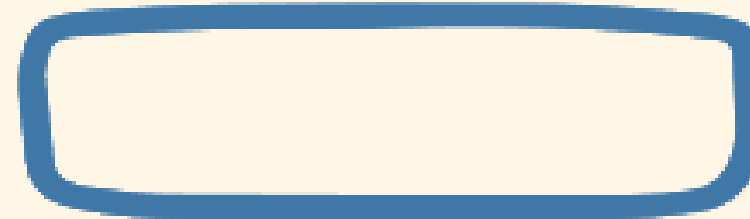

## GOAL OF HCI?

A usable software system to business users include:

- Increased productivity
- Decreased user training time and cost
- Decreased user errors
- Increased accuracy of data input and data interpretation
- Decreased need for ongoing technical support

All of our Aluminum or [Wrought Iron Gates](#), or Fences are designed and manufactured to withstand a range of outdoor conditions. Our commitment to our customers and dedication to produce quality gates has earned us thousands of satisfied customers.

Although we offer a wide selection of Ornamental Designs or Decorative Designs, we can design and manufacture any style in aluminum or wrought iron metals. L. A. Ornamental & Rack Corp also offers Fences, Garden or Walk Thru Gates to match your driveway gates. With over thirty five years of experience in manufacturing and designing elegant, custom, or exotic [Aluminum Driveway Gates](#) and Fences, our past and future customers can have peace of mind that they are receiving quality workmanship. We are a Fence Company that gives our customers 110% of dedication to manufacture quality driveway gates and fences. For a quote please send an e-mail to [LAOrnamental@aol.com](mailto:LAOrnamental@aol.com)

If your looking For Privacy with your Driveway Gates ,Garden Gates, or Walk Thru Gates, we offer a Solid Backing with your choice of Aluminium, Steel, Plexiglas or Plastic. All solid backing are offered in many different colors to choose from. [Privacy Gates](#)

We offer a large selection of Gate Openers and Gate Operators for Residential Driveway Gates, Light or Heavy Commercial Gates, or industrial locations. If your not sure the style or size of the Gate opener / gate operator you need, please e-mail or contact us so we can gladly help guide you to the correct choice. We offer all type of Gate Openers / Gate Operator, Sliding Gate Openers / Gate Operator, Swing Gate Openers / Gate Operator, Hydraulic Gate Openers / Gate Operator. We also have a wide selection of replacement [Main Circuit Boards](#) for all brands, and [Remote Controls](#) for Visors or Keychains.

[Railings](#) - L. A. Ornamental Rack Corp offers top quality Balcony Railings, Front Porch Railings, Deck Railings in Metal, Aluminum, or Wrought Iron Steel. We offer rails for residential or commercial locations for either Interior or Exterior locations. We also offer Custom Made Railings, Decorative Railings, or HandRails that are powder coated paint for low maintenance and long last Balcony Rails, Porch Rails, or Deck Rails

[Garden Gates or Walk Gates](#) can be designed to match any existing or ordered driveway gate. Customers can choose between wrought iron or aluminum as material and choose from our wide selection of powder coated colors. Garden or Walk Gates are custom made that can give your home that special and elegant look.

[Pool Fences](#) - the Aluminum Pool Fence Styles, Aluminum Pool Gate Styles, or the Aluminum Pool Deck Railing Styles that is perfect for your project. We offer decorative pool fences, standard safety fences, or any custom made pool gates for your property that are the essential requirements of commercial crowded areas, or residential properties.

We offer a large selection of Wrought Iron and [Aluminum Driveway Gates](#) , but also browse through our wide selection of Gate Operators, either Sliding or Swing Gate Openers / Operators.

[Access Control](#) - Tele-phone Entry System from Linear, Select Engineering, American Access System, Sentex, For Residential and Commercial Application. A variety of Access Control Equipments, including Remote Controls, Card Readers, Proximity Card Reader, Key Fobs, Wireless

 **Bad UI**

# GOOD VS POOR DESIGN

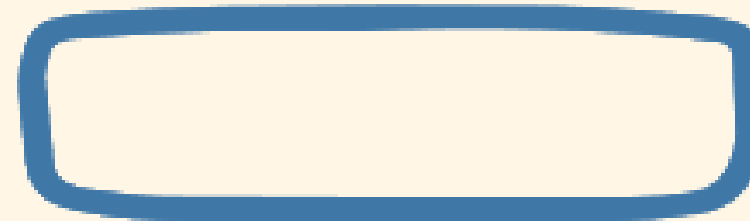

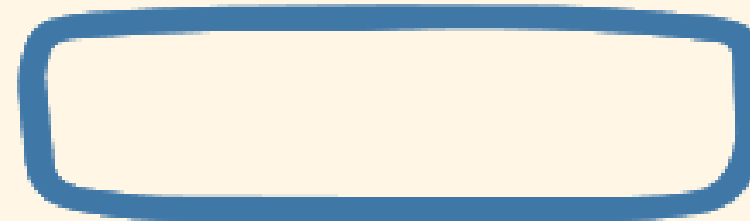

Through identifying the specific weakness and strengths for different interactive products, we can begin to understand the usable or not.

# WHAT TO DESIGN?

- Considering who is going to be using them, how they are going to be used, and where they are going to be used.
- Understand the kind of activities people are doing when interacting with the products.

# WHAT TO DESIGN

Accidentally pressing the wrong button can result in a frustrating, and sometimes humiliating experience, especially for first-time users.

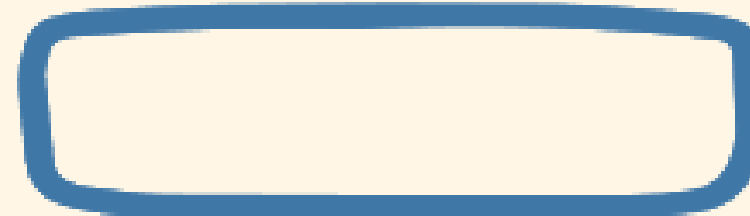

# WHAT TO DESIGN

This involves:

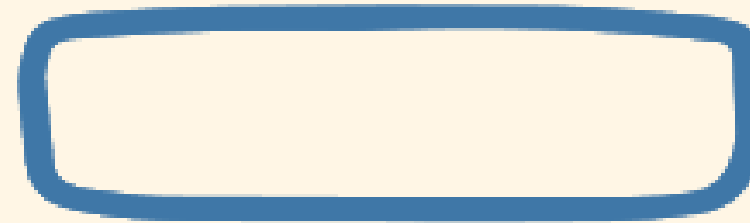

- Taking into account what people are good and bad at.
- Considering what might help people with the way they currently do things.
- Thinking through what might provide quality user experiences.
- Listening to what people want and getting them involved in the design.
- Using tried and tested user-based techniques during the design process.

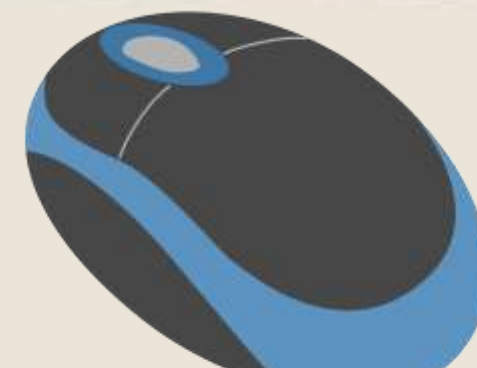

Compare the UI design of **Lazada and Shopee**.

- What are the similarities and differences?
- How does users interact with the application?

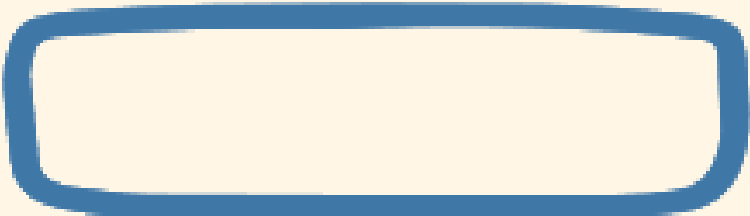

# The User *Experience*

“Designers sometimes refer UX as UXD. D to UX is meant to encourage design thinking that focuses on the quality of the user experience rather than the set of design methods to use.”

Allanwood and Beare, 2014

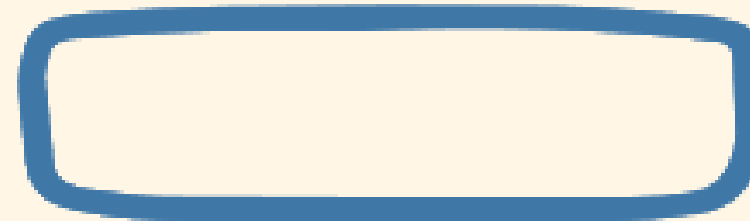

# USER EXPERIENCE (UX)

“It is how people feel about the product and their pleasure and satisfaction when using it, looking at it, holding it, and opening and closing it.”

Wiley 2015

The **user experience (UX)** is central to interaction design. *By this it is meant how a product behaves and is used by people in the real world.*

Question 6

“Every product that is used by someone has a user experience: newspapers, ketchup bottles, reclining armchairs, cardigan sweaters.”

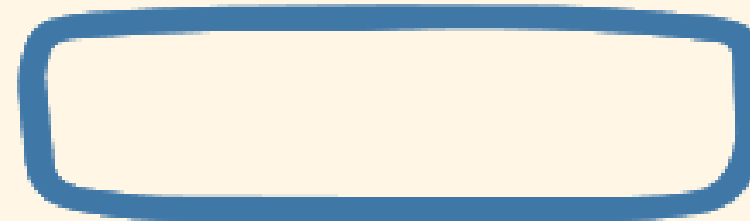

Garrett 2010, p.10

“It is not enough that we build product that function, that are understandable and usable, we also need to build joy and excitement, pleasure and fun, and yes, beauty to people’s lives.”

Norman 2004

UI

UX

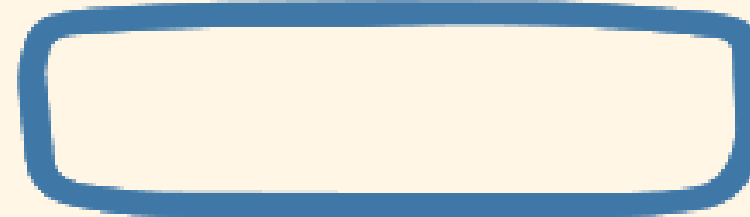

# USABILITY GOALS

- *Usability* refers to ensuring that interactive products are easy to learn, effective to use, and enjoyable from the user's perspective.
- It involves optimizing the interactions people have with interactive products to enable them to carry out their activities at work, at school, and in their everyday lives.

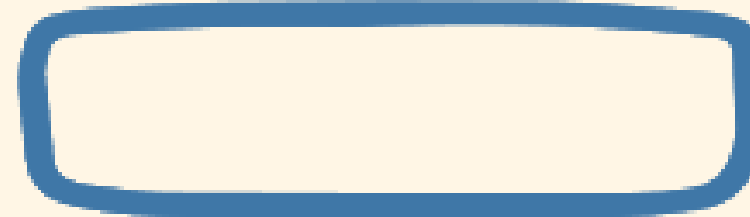

# USABILITY GOALS

More specifically, usability is broken down into the following goals:

1. effective to use (effectiveness)
2. efficient to use (efficiency)
3. safe to use (safety)
4. having good utility (utility)
5. easy to learn (learnability)
6. easy to remember how to use (memorability)

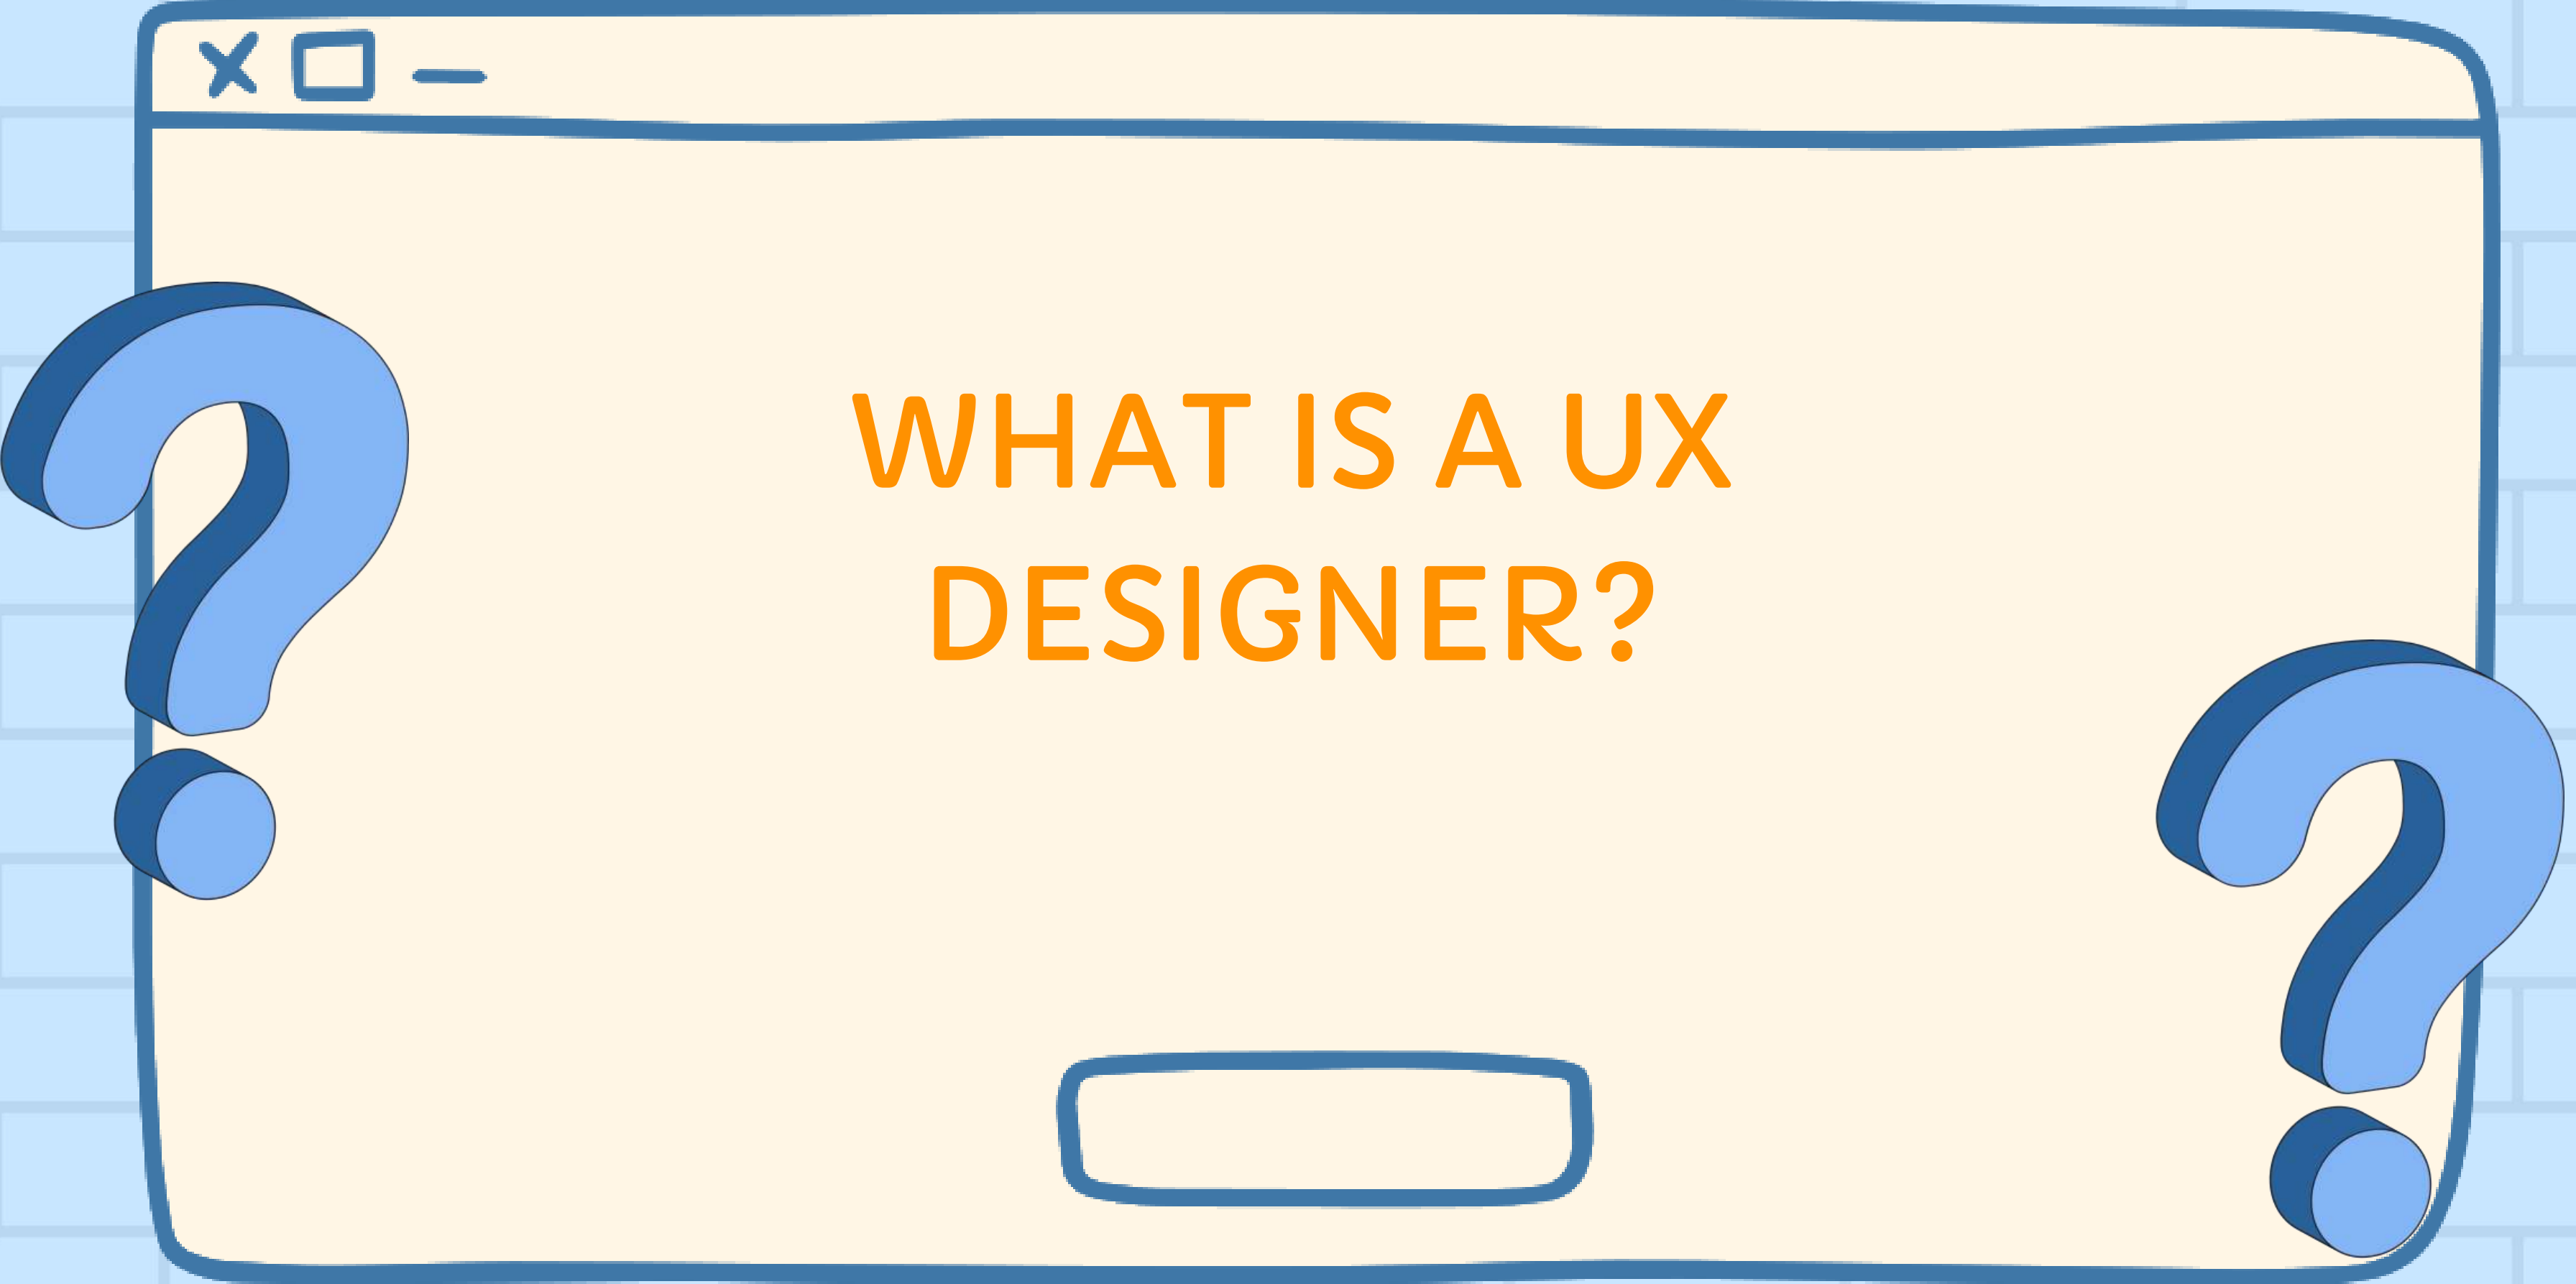

# USABILITY GOALS

**TABLE 1.1**

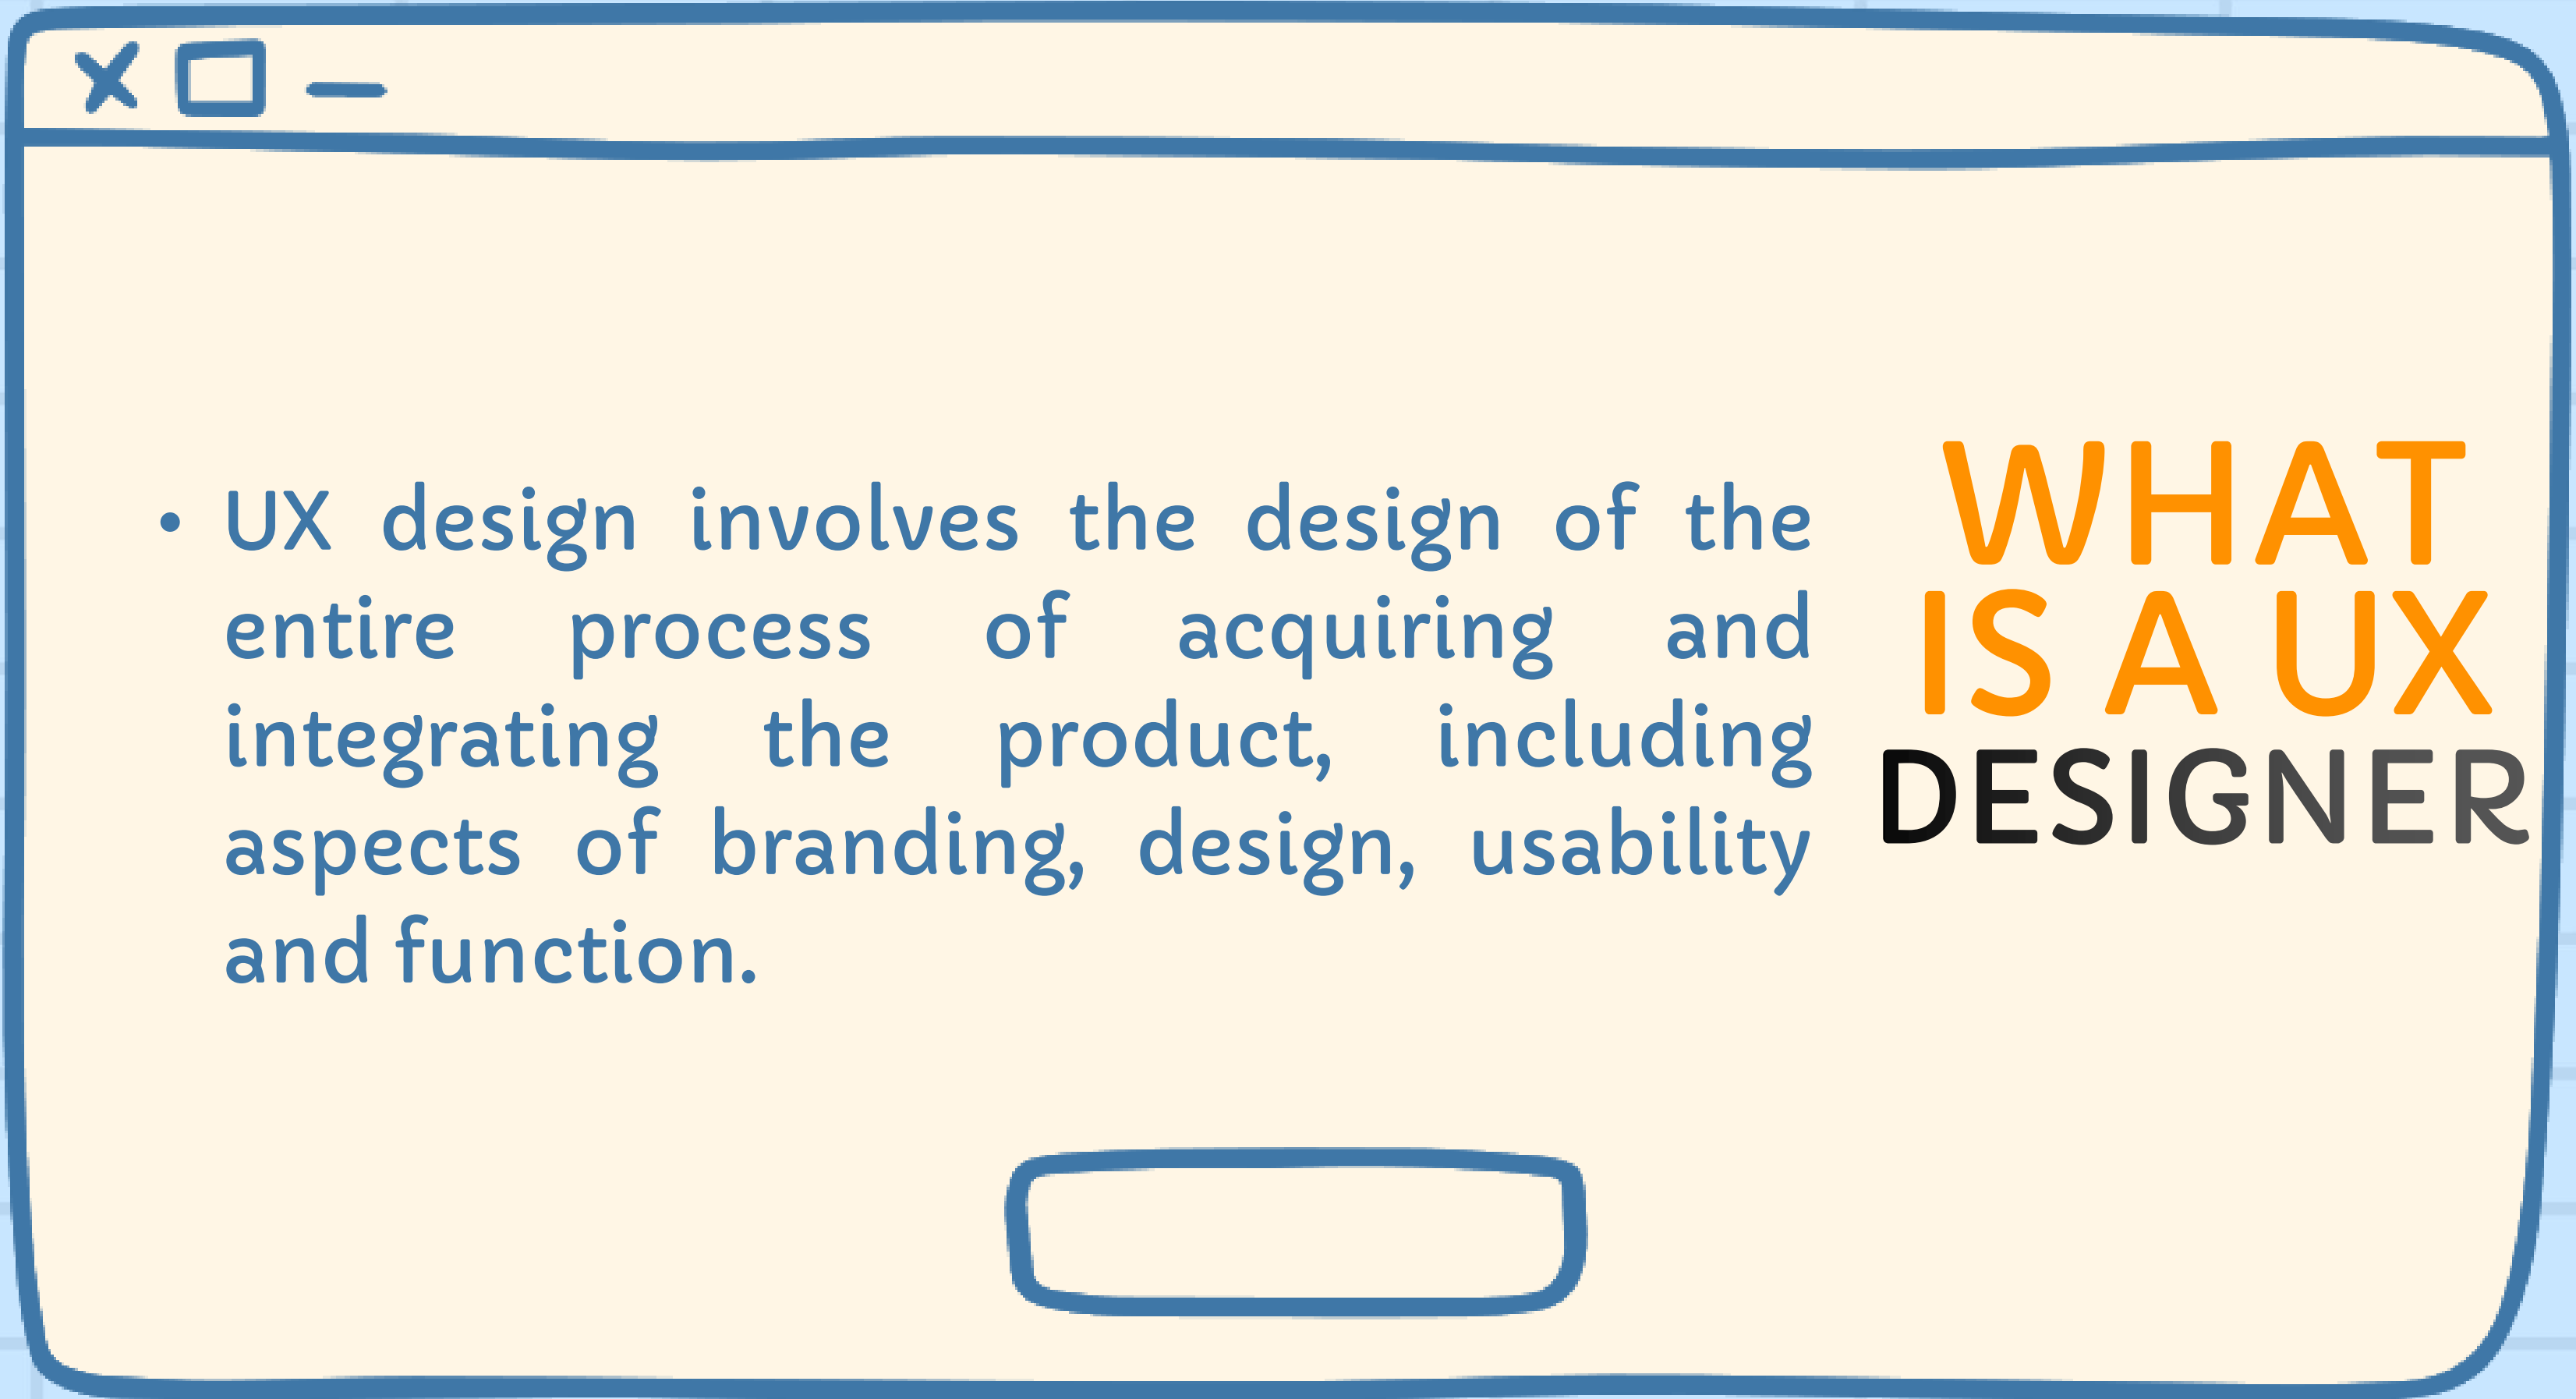

**Desirable and undesirable aspects of the user experience**

|                        |                         |                        |
|------------------------|-------------------------|------------------------|
| Desirable aspects      |                         |                        |
| Satisfying             | Helpful                 | Fun                    |
| Enjoyable              | Motivating              | Provocative            |
| Engaging               | Challenging             | Surprising             |
| Pleasurable            | Enhancing sociability   | Rewarding              |
| Exciting               | Supporting creativity   | Emotionally fulfilling |
| Entertaining           | Cognitively stimulating |                        |
| Undesirable aspects    |                         |                        |
| Boring                 | Unpleasant              |                        |
| Frustrating            | Patronizing             |                        |
| Making one feel guilty | Making one feel stupid  |                        |
| Annoying               | Cutesy                  |                        |
| Childish               | Gimmicky                |                        |

WHAT IS A UX  
DESIGNER?

- 
- UX design involves the design of the entire process of acquiring and integrating the product, including aspects of branding, design, usability and function.

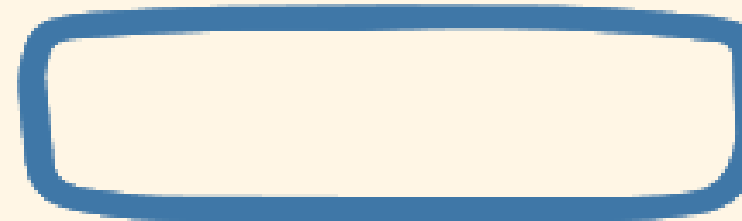

**WHAT  
IS A UX  
DESIGNER**

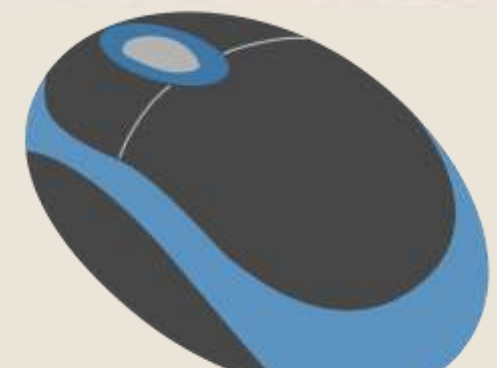

McCarthy and Wright propose four core threads that make up our holistic experiences:

| How to form a coherent whole?                                                                                          | What emotions colour the experience?                                                                                        |
|------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Compositional</b> <ul style="list-style-type: none"><li>- Narrative</li><li>- Estructure</li><li>- Action</li></ul> | <b>Emotional</b> <ul style="list-style-type: none"><li>- Emotions</li><li>- Feelings</li><li>- Desires</li></ul>            |
| <b>Spatio/temporal</b> <ul style="list-style-type: none"><li>- Space/time that pervades experience</li></ul>           | <b>Sensual</b> <ul style="list-style-type: none"><li>- The look and feel of a product (senses)</li><li>- Visceral</li></ul> |
| What effects do place and time have on experience?                                                                     | What does the design make us feel?                                                                                          |

THE USER  
EXPERIENCE  
UX

# The Process of *Interaction Design*

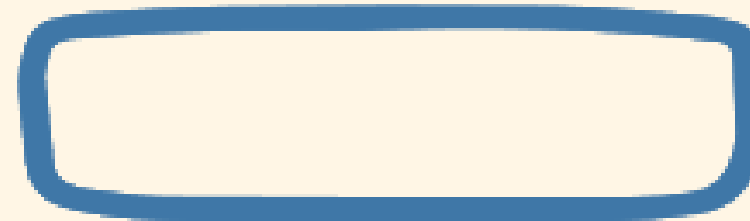

## The Process of Interaction Design

The process of interaction design involves four basic activities:

1. Establishing requirements
2. Designing alternatives
3. Prototyping
4. Evaluating

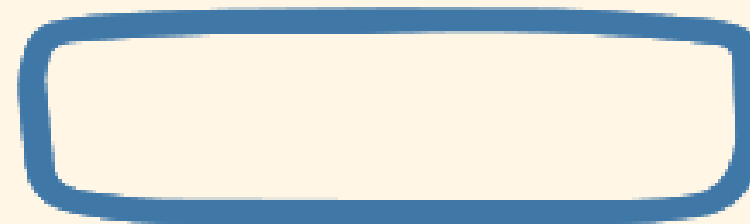

## The Process of Interaction Design

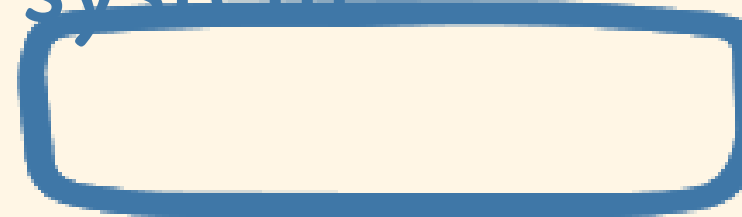

- **Evaluating** what has been built is very much at the heart of interaction design.
- Its focus is on ensuring that the product is appropriate.
- *It is usually addressed through a **user-centered approach to design**, which, as the name suggests, seeks to involve users throughout the design process*

## The Process of Interaction Design

- Understanding the differences between people. Designers must consider the needs, abilities, and preferences of different types of users to create effective and enjoyable experiences.
- Children have different expectations than adults
- Adults may have different goals, experience levels, or ways of interacting with a system

Thank  
*You!*

Finish!
